

"1st. The Industrial School at St. Mary's, under the care of the Roman Catholic Church, whereat forty-two children are boarded—the boys receiving instruction in farming, and the girls in housewifery, needlework, &c. Grant, \$350 per annum.

"2nd. A similar, but little larger, institution, at Metlakahla, under the supervision of Mr. Duncan, supported by the Church Mission Society of London, having an attendance of three hundred and four children. Grant, \$500 per annum.

"3rd. A day school, at Nanaimo, with fifty pupils, under the superintendence of the Wesleyan Methodist Society. Grant, \$250 per annum.

"There has also been authorized the payment of \$300 per annum to each of such seven other schools as may already, or hereafter, be established, in accordance with the wishes of the Indians and the approval of the Indian Commissioner, and having each an attendance of not less than thirty pupils.

"The extension to British Columbia of laws, already in force for the government of Indians in the older Provinces of the Dominion, and the passage, last Session, of a stringent law to put a stop to the liquor traffic among the Indians, are notable circumstances in the year's transactions."

This was in the first report after the entrance of British Columbia into the Confederation, and it is gratifying to find that not only were these seven schools established, (but they have ever since been maintained; and the last report shows an attendance at them of four hundred and eight pupils studying the usual public school branches, and though the attendance is less regular than in the other Provinces, still very pleasing evidences of progress are reported. To counteract this irregularity, one inspector recommends the extension of the principle of the industrial schools to the whole Province. As yet, however, the expense of such a step would involve too great an outlay.

Manitoba and the North-West.

The first school established under Government control in these Territories was opened in 1873, and although only eleven years have since passed there are now forty-four schools, with an attendance of nearly one thousand three hundred pupils. Like every thing else in this new country, these schools are active, vigorous and aggressive, and owe their rapid increase to the fact that the Government bound itself, in every one of the treaties surrendering the Territory, to maintain a school on each reservation—or more than one, if more were required. In addition to these, there are three boarding and industrial schools, which have been recently opened at Qu'Appelle, at Battleford and at High River, near Calgary, on the plan so successfully tried in the older Provinces. Here, too, the Government found a few religious schools, but for the most part the soil was virgin, and is destined to produce a return incalculable by any human means in the social elevation of the many thousand Indians scattered over the fertile reserves guaranteed to them forever by the faith of treaties which will never be broken.

Report for 1884.

Just while I was collecting the above data, the Superintendent-General's report for 1884 was announced as soon to be issued, and I have been permitted to make some valuable extracts from it. These are of the most favorable character, as will be seen by the following:—

"The erection, at the expense of the funds at their credit, of more commodious school houses, the repair and improvement of the old buildings, and the supplying of modern school furniture, books and materials, for the better education of their children, afford proof of increased interest in the important matter of education * * *

* * * Schools for the higher education of Indian youth should be established in the Provinces of Quebec, New Brunswick and Nova Scotia, in which the brightest and most promising pupils of the day schools might be trained in industrial pursuits, the knowledge of which would eventually enable them to rise in the social

scale to an equality with the white artizan or husbandman * * * The progress of Indian children at day schools, however effectually conducted such institutions may be, is very greatly hampered and injuriously affected by the associations of their home life, and by the frequency of their absence and the indifference of parents to the regular attendance of their children at such schools * * * I would suggest, in order to give practical effect to the above ideas, that two schools of the industrial type, with accommodation for at least eighty pupils in each, should be established in the Province of Quebec, and one of such institutions in each of the Provinces of Nova Scotia and New Brunswick; and that into either of the latter institutions Indian children from Prince Edward Island be also admitted—the number of schools to be hereafter increased, should the success of those first established justify such augmentation."

It will be seen from the above extracts from his report that the Right Hon. the Premier, who is Superintendent-General of Indian Affairs, does not intend to pursue a policy of masterly inactivity in the treatment of the Indian problem; but recognizing its very great importance, he proposes to deal with it in a statesmanlike manner, and in accordance with the traditions of the Canadian Indian policy.

In this rapid manner—for I regret to say that the time at my disposal, aside from my college duties, for the proper treatment of so large a subject, was very limited, inasmuch as the request to prepare the paper was conveyed to me only twelve days before it is to be handed in—I have endeavored to overtake the more salient outlines of a system of education unique from its inception and growth, and commanding respect from its highest recommendation—*success*.

I have to acknowledge the great assistance afforded by the Deputy Superintendent-General of Indian Affairs, L. Vankoughnet, Esq., who kindly placed at my disposal, on the request of the Right Hon. the Premier, every available means in his office, in order to obtain as full details as possible.

But the educational facilities afforded by the Government have not yet been exhausted, and the policy of placing the Indians on reservations having been deliberately adopted, it was thought that something more ought to be done, and so seed was provided, agricultural implements supplied, cattle, hogs, sheep, and even horses, in many instances, were furnished, and competent men appointed to instruct the Indians in the use of them. In the North-West twenty-six such agencies of an educational kind are at work, and the returns are something wonderful, if we remember that this method of instruction has been in operation only four years.

The Indians are becoming very fast a self-supporting class of people, and they hold in their own hands the means of making themselves wealthy and respected.

Their nomadic life is gradually becoming a thing of the past; their wars are no more heard of; their epidemics of small-pox and other zymotic diseases are gradually yielding to the preventive measures so cheerfully and amply supplied by the Government. Their wild untutored, and hence suspicious nature, is gradually becoming tamed, and under the combined influence of paternal government and mutual esteem they are fast qualifying themselves to become useful citizens.

So fully is this grand result shared by the authorities of the Indian Department that in the last Session of the Dominion Parliament an Act was passed, under which the Indian either at once becomes enfranchised, or may acquire municipal rights of self-government, and become, on certain conditions, entitled to all rights and privileges of citizenship, without many of the burdens incident thereto.

But it may naturally be enquired by some: All this costs money, and whence comes that most needful commodity for these various purposes? In reply to this question I may say that the Indian Department is more than self-sustaining, and that in the far off future, when the Act of 1884 shall have been adopted by all the tribes, there will be an amount available for the posterity of those nomads of the forest in value beyond their wildest dream. Nor can we doubt that the wisdom which, during the past century, has created a fund of more than \$3,000,000 will, when that time comes, fail to find a proper use for it in connection with still further measures for exalting the social, spiritual and intellectual status of the red men of the Dominion of Canada.

ANNUAL REPORT—LAND SALES BRANCH.

The land sold during the year amounted to 9,628.82 acres, and the sales to \$13,183.23.

The quantity of land still in the market in round numbers is 465,859 acres.

The new sales entered, 142.

Leases issued, 171.

Number of payments entered on old sales, 580.

Number of payments on leases, 406.

Total collections on account of old and new sales of land and timber, and also on account of rents amounted to \$89,485.69.

Agents' returns examined and entered, 231.

Assignments of land examined and registered, 625.

Descriptions for patents prepared and entered, 224.

Patents examined and despatched, 224.

Patents cancelled, 4.

Sales cancelled, 15.

Location tickets issued and entered, 32.
